To: Franziska Nonnenmann [REDACTED] Councillor Matlow <councillor_matlow@toronto.ca>

Good afternoon Franziska,

Thank you for your email. We hope you are keeping well, and staying safe amidst the pandemic.

Councillor Matlow is very grateful for your feedback. He has directed that I share it with Toronto Public Health, and the Emergency Operations Centre for their consideration. Just wanted to quickly highlight that people with medical conditions that don't allow them to wear masks are exempt and no proof is required.

Feel welcome to contact me if you have any further questions and/or concerns.

Have a nice day.

Regards,

Fertaa Yieleh-Chireh, Constituency Assistant to Councillor Josh Matlow

to Mr. John Tory and all the council members of the city of Toronto.

I strongly disagree with the mandatory mask policy recently announced and passed by the city of Toronto's elected officials.

I agree with the position of the Ontario Liberty Association that the effectiveness of arbitrarily imposing face masks is without any reliable scientific evidence.

Furthermore, we're not being told the full truth about the entire covid situation from the start and I can clearly see how politics got in the way.

The WHO has lost its integrity and this can also be said about our mainstream media unfortunately. We are living in a world of misinformation at its best.

Professionals who are coming forward with scientific facts are being ignored or worse.

Not for a minute do I believe that mandatory masks are necessary or useful, indeed they can actually be harmful to one's health, due to a serious drop in oxygen levels within minutes!. This is a scientific fact. And that this by-law is even demanding children over the age of two to wear masks is outrageous and harmful to say the least, not only is this measure dangerous to a child's health but also to the wellbeing of their mental health.

Why is there suddenly now such a draconian rule unleashed on the general population to wear masks, now that the infection rates are dropping? They were clearly dropping without the "help" of mandatory masks in the previous months. Where is the logic here?

In the middle of a heatwave, when we know that this virus can not survive in warm temperatures. I have seen and read enough evidence to show me that wearing a

mask makes no sense. I urge you all to research it for yourself with open eyes to see and make up your own mind, instead of listening to the media rhetoric.

When I wear a mask, I get a severe headache from the lack of oxygen within minutes. I have an intrinsic human right to decide for myself to wear a mask or not and no city by-law can take this right away from me.

I fully agree with the OCLA's statement:

"Arbitrarily applying state power by imposing such unjust and baseless laws violates civil rights and personal dignity and harms the very fabric of society."

I urge you to to immediately repeal your recent decision for mandatory masks in Toronto

kind regards

Franziska Nonnenmann
