Hello

Than you for the quick reply Mr Mayor.

Can you please tell me, as of today, the ages of the 47 deaths of Hamiltonians from COVID, their pre existing conditions and how many were in care homes or any institutional settings.

Also, I would kindly like any statistical data regarding :

the number of people who have lost jobs and or their business and the cost and debt accrued due to such ,

Lost or defaulted on mortgage payments rent, lost homes, etc

any other tangible losses of property or material belongings vehicles, recreational vehicles etc

Amount of overdoses, mental health related health incidents, suicides, emergency mental health visits etc

health issues associated with the inability to acquire health care due to shut downs and restrictions, surgeries that have been canceled or pushed to a further date, worsening illness due to lack of health care availability, missed regular appointments and emergency and regular screening (blood and any other testing ct, mri, xray)

Cases of spousal and or child abuse during the covid measures, and any other domestic issues divorce/ seperation etc .

Any other noted effects that lock downs have resulted in causing issues to general public.

Also , in the event the general population does not voluntarily accept to take a vaccine, what is your plan?

Thank you
Sarah

Thank you Sarah for your email and comments. I will say that I categorically disagree with just about everything you have said and we will continue to ensure that the well thought out public health recommendations are followed in the interest of public safety until such time as a vaccine is broadly available.

Having said that you are entitled to your opinion and I respect the fact you have shared it.

On the issue of herd immunity I think most experts agree that if that path is chosen it will mean significantly more deaths than what we are experiencing now.

I and most leaders and citizens I know are not prepared to write off any percentage of our citizens.

Again thanks for sharing and continue follow the public health guidelines.

Cheers Fred

>

> As the "two weeks to flatten the curve" has brought us from March to mid October, I am wondering when the end is?

>

> As time has went by we 've learned a few things. The elderly and those with pre existing health issues are the ones who make up fatalities. This spreads no different and does not much more than any other coronavirus and basically yearly flu. And the damage being done to peoples health and wellness, including financial aspect of the economy and personal incomes, are being damaged more by these measures than the virus. Most people are recovering within a week and returning to life, while we are now over a half a year later into these draconian measures with no end in site.

>

> As you know, or should, the case numbers of infection do not correlate into deaths. The rate of infection , like any other cold, virus flu or disease , does not equal death at 100 percent. So why are we acting as it is and portraying that picture? When the rate of testing shows that 1.6 percent or less of those being tested actually have the virus and even less of that 1.6 percent of positive tested will die, why are we carrying on with this?

>

> The shut downs, social distancing, masks, and now on to vaccines, then whatever other genius idea as a bunch of po iticans and bureaucrats who try and re invent the wheel of basic illness spread. Many countries are operating at regular or near regular capacity and "normal" life without issues. What are we waiting for?

>

> Recently , several media outlets have published that drs and other health experts including scientists are claiming a heard immunity through natural infection is the safest and best way to move forward and that these "safety measures" have actually dragged out the illness and it would be nearly over of left to naturally act as every other flu and virus in history has. Normal life would result in the dying out of the virus with safety measures only needed for the elderly and ill. Why are we dragging this out and causing more damage ?

>

> For how long are politicians and their bias paid drs and medical "officers" going to keep this clown circus going ?

>

> Right now , the financial issues from this out weight the need for any restrictions from healthy people under 75-80. The mental health decline of people is causing more harm. And the health and physical well being of the general public is more at risk due to these measures than the virus.

>

> So I am asking, when are we going to stop with these ridiculous "safety measures' and get back to life? Other than a quick grab at policy changes at the federal, provincial and municipal levels, these emergency measures have served no purpose to anyone else but big business, the banks, politicians and the rich.

>

> So my question is this, with the continuation of these tyrannical, unneeded , and unproven measures - are we continuing because we are stupid , or because there is another agenda that is being adopted by backdooring them away from the public knowledge while the dog and pony show continues?

>

> I would like to remind you or alert you to the fact I do have a background in psychology and am not simply reading "conspiracy theroires" , I am using the knowledge I have based in the education I received when I see the measures vs the need are not in line with each other and it is time we stop this or alert the general public to the agenda at hand and your willing participation and compliance in it.

>

> As we move forward and watch the hysteria and hypochondria from the public and government alike, I ask when are we done and resuming life? Im tired of it and so is most of society.

>

> I hope that some people want to do what is right and stand on the side of having an interest in the well being of the public, and not of that of the false science and propaganda of the WHO, and other players in this overblown "pandemic".
